

# ABI Precious Metals

## ABI's Anti-tarnish Dip Solution ATD 3

### Features

- Provides durable tarnish protection for Sterling Silver and base metal alloys
- Eliminates the need for rhodium plating

### Benefits

- Easy to use and non-hazardous
- Provides tarnish resistance equal to 14 kt. Gold
- Great durability with 12 – 18 month wear protection after sale
- Extremely thin coating is non-hazardous and has no plastic feel

Pricing: \$ 85 per 1 liter bottle which makes 10 liters of solution

### Technical Data

- Shelf life of 1 year in the bottle or in solution
- Coverage of 6,000 sq. inches per 1 liter bottle in 10 liters of solution (10% concentration)
- Stir well before using
- Replenishment possible – see titration procedure
- Bath **MUST** be maintained between 120° F – 130° F (49°C – 55° C)
- Treatment time is 4 – 8 minutes
- Separation/partial solidification will occur if stored at temperatures below 77 F (25 C). By warming the container in 104° F tap water the concentrate will again become a clear, yellow/orange liquid
- **WARNING** – Solution must be monitored and kept at the proper temperature and 10% concentration to achieve maximum tarnish resistance
