

ABI Precious Metals

Nickel Free White Bronze

ABI introduces our newest sterling alternative alloy with the following benefits:

- Bright white rhodium color
- Excellent casting properties at low temperature (950°C) with fluid metal flow and minimal porosity.
- Good tarnish resistance
- Cast trees recyclable at 50/50 (old to new metal)
- Lower metal density yields 25% more pieces per ounce than sterling
- Ecologically friendly – no nickel/or other hazardous metals (i.e. lead, cadmium)
- Higher durability than sterling due to 25% increased metal hardness
