Sterilite Sterling Replenisher

The Sterilite Replenisher is designed to replace the zinc and silicon that is burned off during the casting process. By adding a small amount of replenisher to your old trees and buttons you can recycle 100% of your clean Sterilite scrap. Other benefits of the replenisher are as follows:

- Improved cast brightness and reduced porosity (Eliminate Fire scale)
- Increased tarnish resistance
- Reduced sterling refining cost
- Lower silver cost by eliminating shipment of high assay sterling
- Only 1 part (1.25%) replenisher to 80 parts clean scrap needed to restore cast brightness

The replenisher contains approximately 70% silver along with zinc, silicon and other additives to enhance the casting properties of re-cast Sterilite Sterling. Pricing is as follows:

Silver Factor (70% x \$40.00 Silver)	\$28.00/oz.
Alloy and Fabrication	<u>\$ 3.25/oz.</u>
	\$31.25/oz.

Based on minimum 25 oz. purchase at \$40.00 silver with payment made in 30 days. A 3% discount is available for payment on delivery. Delivery FOB Carson, CA Add .75/oz. on orders under 25 oz. (Minimum order 10 oz.)
